

SWASTHIK P. B.

Junior Network Engineer | CCNA Certified

Thrissur, Kerala, India | +91 7034316713 | swasthikpb@gmail.com | [linkedin.com/in/swasthik-pb](https://www.linkedin.com/in/swasthik-pb)

PROFESSIONAL SUMMARY

CCNA-certified Junior Network Engineer with hands-on experience in enterprise routing, switching, and firewall administration. Proficient in configuring Cisco hardware, managing VLANs, dynamic routing protocols (OSPF, EIGRP), and troubleshooting L2/L3 network connectivity. Proven track record of managing IP network infrastructure for edge systems, CCTV surveillance, and multi-site subnets. Target role: L1 Network Operations / NOC Engineer.

CERTIFICATIONS & EDUCATION

- **Cisco Certified Network Associate (CCNA 200-301)** – Cisco Systems *Credential ID: CSC015235456*
- **FortiGate 7.6 Operator (Self-Paced Training)** – Fortinet Training Institute *Completed*
- **Bachelor of Science in Computer Science** – College of Applied Science Vattamkulam *2020 – 2023*

TECHNICAL SKILLS

- **Routing & Switching:** OSI Model, LAN/WAN, OSPF, EIGRP, Static Routing, VLANs, Inter-VLAN Routing, STP/RSTP, EtherChannel, Layer 3 Switching, Subnetting (VLSM)
- **Network Security & Firewalls:** Fortinet (FortiGate basics), Access Control Lists (ACLs), Port Security, NAT/PAT, SSH, VPN Basics
- **IP Services & Monitoring:** IPv4/IPv6, DHCP, DNS, TCP/IP, UDP, ARP, ICMP, Syslog, RTSP
- **Platforms & Tools:** Cisco IOS, Packet Tracer, EVE-NG, Linux, Git, GStreamer

PROFESSIONAL EXPERIENCE

Junior Network Engineer
Shazab Futuretech Solutions

June 2024 – September 2025
Bangalore, Karnataka

- Engineered and managed IP-based network infrastructure across multi-site networks for high-definition RTSP surveillance systems.
- Diagnosed and resolved Layer 2 and Layer 3 network issues (TCP/IP, ARP, VLANs, static/dynamic routing) to ensure high network availability.
- Managed basic perimeter security using static NAT/PAT configurations and Access Control Lists (ACLs) on network equipment.
- Monitored real-time performance metrics (bandwidth, latency, CPU/memory usage) for network switches and edge equipment.
- Configured SIM-based cellular routers and GPS modules for remote site-to-host connectivity and telemetry management.
- Optimized network traffic and reduced latency for RTSP video pipelines across bandwidth-constrained links.

TECHNICAL TRAINING & HANDS-ON LABS

CCNA & Network Security Lab Practicum
Info Campus

January 2026 – July 2026
Kozhikode, Kerala

- Configured dynamic multi-area OSPF and EIGRP routing topologies on physical Cisco routers and switches.
- Practiced trunking (802.1Q), inter-VLAN routing, Spanning Tree tuning, and link aggregation (EtherChannel).
- Used EVE-NG and Packet Tracer for enterprise-level troubleshooting using ICMP, ARP, and CLI packet captures.
